### About Innventure

Innventure finds, funds, and operates companies with a focus on transformative, sustainable technology solutions acquired or licensed from multinational corporations. As owner-operators, Innventure takes what it believes to be breakthrough technologies from early evaluation to scaled commercialization utilizing an approach designed to help mitigate risk as it builds disruptive companies it believes have the potential to achieve a target enterprise value of at least \$1 billion. Innventure defines "disruptive" as innovations that have the ability to significantly change the way businesses, industries, markets and/or consumers operate.

### Non-GAAP Financial Measures

We use certain financial measures that are not calculated in accordance with generally accepted accounting principles in the U.S. (GAAP)

to supplement our consolidated financial statements. These non-GAAP financial measures provide additional information to investors to facilitate comparisons of past and present operating results, identify trends in our underlying operating performance, and offer greater transparency on how we evaluate our business activities. These measures are integral to our processes for budgeting, managing operations, making strategic decisions, and evaluating our performance.

Our primary non-GAAP financial measures are EBITDA and Adjusted EBITDA. We define EBITDA as net income before interest, income taxes, and depreciation and amortization. Adjusted EBITDA is defined as EBITDA further adjusted to exclude certain non-cash items, non-recurring expenses, and other items that are not indicative of our core operating activities. These may include stock-based compensation, acquisition costs, and other financial items. We believe Adjusted EBITDA is valuable for investors and analysts as it provides additional insight into our operational performance, excluding the impacts of certain financing, investing, and other non-operational activities. This measure helps in comparing our current operating results with prior periods and with those of other companies in our industry. It is also used internally for allocating resources efficiently, assessing the economic outcomes of acquisitions and strategic decisions, and evaluating the performance of our management team.

There are limitations to Adjusted EBITDA, including its exclusion of cash expenditures, future requirements for capital expenditures and contractual commitments, and changes in or cash requirements for working capital needs. Adjusted EBITDA also omits significant interest expenses and related cash requirements for interest and payments. While depreciation and amortization are non-cash charges, the associated assets will often need to be replaced in the future, and Adjusted EBITDA does not reflect the cash required for such replacements. Additionally, Adjusted EBITDA does not account for income or other taxes or necessary cash tax payments.

Investors should use caution when comparing our non-GAAP measure to similar metrics used by other companies, as definitions can vary. Adjusted EBITDA should not be considered in isolation or as a substitute for GAAP financial measures.

In presenting Adjusted EBITDA, we aim to provide investors with an additional tool for assessing the operational performance of our business. It serves as a useful complement to our GAAP results, offering a more comprehensive understanding of our financial health and operational efficiencies.

(1) Interest expense, net – For the combined twelve months ended December 31, 2024, interest expense, net includes interest incurred on our various borrowing facilities and the amortization of debt issuance costs. Additional debt issuance cost associated with a loan commitment fee asset in the amount of \$10,041 was written off in combined twelve months ended December 31, 2024 and has also been included in this adjustment. This amount is representative of the asset associated with the second and third tranches of the WTI facility. When it became known that we would not be able to draw on these subsequent tranches based on certain metrics contained within the WTI Facility agreement, we immediately wrote this asset off. For the Predecessor year ended December 31, 2023, this balance is comprised entirely of interest incurred on our various borrowing facilities.

(2) Transaction and other related costs – For the combined twelve months ended December 31, 2024 and for the Predecessor year ended December 31, 2023 this is comprised entirely of consulting, legal, and other professional fees related to the business combination with Learn CW Investment Corporation (the “Business Combination”).

(3) Change in fair value of financial liabilities – For the combined twelve months ended December 31, 2024 the change in fair value of financial liabilities primarily consists of the change in fair value of the warrant liability, change in fair value of the earnout liability, and the change in the fair value of the embedded derivative associated with convertible notes prior to extinguishment. For the Predecessor year ended December 31, 2023, this is comprised entirely of the change in fair value of the embedded derivative associated with the convertible notes.

(4) Stock based compensation – For the combined twelve months ended December 31, 2024 stock based compensation primarily consisted of awards in the 2024 Equity and Incentive Plan entered into on October 2, 2024 subsequent to the Business Combination. These awards consisted of Stock Options, Restricted Stock Units, and Stock Appreciation Rights. Further, a portion of this expense was related to share based payment employee incentive plans in existence at Innventure LLC and other subsidiaries. For the Predecessor year ended December 31, 2023, stock based compensation was comprised wholly of share based payment employee incentive plans in existence at Innventure LLC and other subsidiaries.
